# 4 Tips To Start From Zero

I'm a successful entrepreneur and a millionaire. Imagine I lost everything today and had to start from scratch.

## What would I do?

Here are my insights on how I would make a financial comeback. This is the advice I would give myself:

### Strategic Connections

Your inner circle **defines your financial trajectory**. If people around you are successful, you are successful.

**Cut ties** that don't positively contribute to your life.

Attend **networking events** to surround yourself with the right people.

**Why do this?**  
Success thrives in the right company.

### Passion-Driven Focus

#### Do What You Love

Starting anew means zeroing in on your **strengths and passions**.

**No time** for pursuits that don't align with your heart.

Finding **joy in daily tasks** leads to unlocking your full potential.

**Why?** Happiness fuels success.

### Disciplined Investments, Big or Small

#### Little steps

Even a **modest \$5** holds significance—it's about the discipline. It serves as a daily reminder of your ultimate goals.

#### Consistency

Consistently investing **10-20-30 %** of your earnings ensures progress. Why? Small, steady steps pave the way for significant gains.

#### Focus

**Ditch the allure of brands.** Redirect that energy into meaningful investments—stocks or promising startup crypto projects. Authenticity trumps the pretense of cool.

**Why?** Why? Real wealth stems from smart choices.

### Strategic Relocation for Financial Leverage

Ever considered relocating to countries with a **lower cost of living** like Thailand or Georgia?

#### WHY?

This move not only frees up funds for investments but also expands opportunities to pursue your passions.

If you're serious about mastering this strategic approach, consider enrolling in my course. It's not just about finances.

I will share with you my **11 laws of money**, a comprehensive guide to turning your life into an abundance.
